

2" x 3" Reducing Male Adapter

For the Virginia Graeme Baker Pool and Spa Safety Act.

Virginia Graeme Baker Pool and Spa Safety Act states that "each public pool and spa in the United States must be equipped with anti-entrapment devices or systems that comply with the ASME/ANSI 112.19.8 performance standard or any successor standard".

ASME/ANSI 112.19.8 limits the maximum allowable flow rate to relegate the velocity across the pool drain. LASCO Fittings' new 436-253 Reducing Male Adapter helps to lower the flow rate by utilizing a 3" PVC pipe system with the pool drain.

436-253 Reducing Male Adapter

- 2" MIPT x 3" Slip
- Meets or Exceeds ASTM D-1784 and ASTM D-2466, Schedule 40
- Made in the USA
- Helps make your Pool or Spa ASME/ANSI 112.19.8 Compliant
- Helps make your Pool or Spa Virginia Graeme Baker Pool and Spa Safety Act Compliant
